

KEEP YOUR PROMISE

A Trusted Anchor of Hope to America's Small Business

The Small Business Administration was created on July 30, 1953, by President Dwight D. Eisenhower with the signing of the Small Business Act, currently codified at 15 U.S.C. ch.14A. This agency was created to provide support to entrepreneurs and small business. The mission of the Small Business Administration is "to maintain and strengthen the nation's economy by enabling the establishment and viability of small businesses and by assisting in the economic recovery of communities after disasters."

Our company is requesting that the Small Business Administration keep the promise of its mission to all the people in America no matter gender, racial, and/or sexual orientation, and especially no matter the zip code of the applicants.
